

Fieldwork Methods and Representing Results (NC 1, 7, 9 and 15)

Across

- 2** This type of graph is often used to show population age groups and sex (7)
- 3** Drawing of a view during fieldwork (6)
- 7** A very important thing to remember rules about during fieldwork like when crossing roads (6)
- 10** A circle divided up into segments to show percentages is often called this item of food graph (3)
- 11** Information collected during fieldwork is from a primary source. Other information may be from _____ source such as books. (9)
- 14** On a farmer's land it is important to keep to these unless permission has been gained to leave them (9)
- 16** This type of graph is good for showing total figures like monthly rainfall (3)
- 17** _____ boots are worn on the feet when studying a river (10)
- 18** Used to capture views during fieldwork (6)

Down

- 1** A _____ graph is good to use to show how figures change over a period of time (4)
- 2** You might measure these on a beach and decide how rounded they are (7)
- 3** Unless it is a rough sketch map any map must have one of these to be able to measure distances (5)
- 4** When you draw a map it is very important to include this to show what colours and symbols mean (3)
- 5** Used for finding directions (7)
- 6** You might use this to get information from people (13)
- 8** Large scale maps can be used to plot the _____ of each building (8)
- 9** Figures gained by standing near a road are called a _____ count (7)
- 12** Used to plot fieldwork results on (3)
- 13** On a map show the direction of north with this (5)
- 15** You need to watch for this affecting water level on a beach (4)
